BE CAREFUL, DO NOT PUT YOURSELF IN DANGER
IN THE EVENT OF A FIRE, FIRST CALL EMERGENCY;
THIS DEVICE DOES NOT REPLACE THE INTERVENTION OF FIREFIGHTERS BUT ALLOWS YOU TO FIGHT AGAINST THE OUTBREAK OF FIRE WHILE AWAITING THEIR INTERVENTION.

FIRE HOSE

Hand hose with adjustable flow and jet

This fire hose comprises 2 operating modes:

- **Attack**: the jet is straight and targeted to stop a fire.
- **Defense**: a wider and more diffuse stream that aims to protectheat and fumes.

The Pool Sam is a Poolex innovation that means well!

Are you a swimming pool owner aware of a fire risk that can happen near you? Pool Sam is an emergency device that uses your swimming pool water to light off small fires or limit a fire outbreak while awaiting for the firefighters. According the Ministry of Interior, more than 300 000 fires are detected each year in France, and most find their source in gardens and surroundings.
