FILTRATION GROUP for above ground pools

€ For swimming pools up to 20 m³

This model is perfectly suited to equip any above ground 20m³ swimming pool. It is compact, very easy to install and use, without any particular requirements. This 2 in 1 group combines a pump and filtration to keep your pool water clean and safe. Impurities are retained in the filtering media inside the tank. The group is equipped with a pre-filter that retains excessively large particles avoiding any damage to the pump. Its multiport valve (6 way) supports several functions: self cleaning, filtration, drainage, rinse ...

Warranties

- Against material defects
- Includes labour in our workshop

Technical Data

Electricity supply	220-240V
Maximum water flow (m ³ /h)	3.03
Power	60W
Packaging dimensions (cm)	37x37x47
Dimensions (cm)	37x34x58
Net/Gross weight (kg)	5.5 / 6.7
Maximum operating pressure (bar/psi)	< 0.2 / 3
Efficient filtration surface (m ² /ft ²)	0.058 / 0.62
Maximum water temperature (c °)	35
Recommended use	Sable de quartz ou de verre No. 20
Recommended sand quantity (kg)	10
Recommended sand quantity	> 1.75
Certification	CE
