SPA UMBRELLA

Designed for the spa

Classic and elegant, the Netspa umbrella shelters you from the sun's rays during the day, and offers you a bright atmosphere at night thanks to its clever LEDs integrated into the structure and powered by a solar panel.

Enjoy your spa in peace. Its steel structure gives it great strength while its crank opening system allows easy handling. For optimal stability, weight up the base by filling it with water.

Crank handle

Deployment lever

Steel base + ballast

Transport wheels

ADVANTAGES

- Ideal diameter
- Integrated LEDs powered by solar panel
- UV resistant canvas
- Steel structure
- Base with integrated transport rollers
- Base ballasted with water or sand (Sand not included)
