

Cobra

A unique design

The Cobra solar shower, made of HDPE, blends seamlessly into any outdoor space. Its 32 L tank heats naturally under the sun, offering a 100% eco-friendly solution. With its original, colorful, and lightweight design, it easily connects to any water supply.

- **Solar energy :** Natural and cost-effective heating using the sun's rays, allowing you to enjoy a hot shower powered by solar energy.
- **32L capacity :** A generous tank for multiple showers without running out of hot water.
- **Included foot rinse :** Practical and discreet, it lets you quickly rinse your feet without using the main tank's water.
- **Original design :** A unique shape with bold lines that adds a touch of character to any outdoor space.

The shower with bold design!

With its bold design combining sleek curves and reptile-inspired textured details, this solar shower becomes a true centerpiece for your garden. More than just a functional piece, it transforms into a decorative element in its own right, enhancing your outdoor space with its sculptural look and original design.

Equipped with an adjustable rain-effect showerhead, it delivers a gentle, enveloping spray for a refreshing experience. Its mixer tap allows precise temperature control, while the stainless steel foot rinse adds a practical and refined touch to the whole.
