FILTRATION CAPACITY

WIRELESS & AUTOMATIC

AUTOMATIC ELECTRIC CLEANER
RED PANTHER

The ideal robot to clean the bottom of the pool. Suitable for all flat-bottomed basins, regardless of their shape or coating. Fully Automatic, it begins its cleaning cycle once immersed and automatically approaches the edge when the cycle is complete.

It changes direction thanks to its detection system when it comes into contact with a wall. Removing from the pool is easy thanks to its floating handle and its removable filter allows for quick cleaning. This robot incorporates a Lithium-ion battery, giving it an exceptional autonomy of 120 min.

- AUTOMATIC ELECTRIC CLEANER
Batterie Li-ion 6600mAh integrated

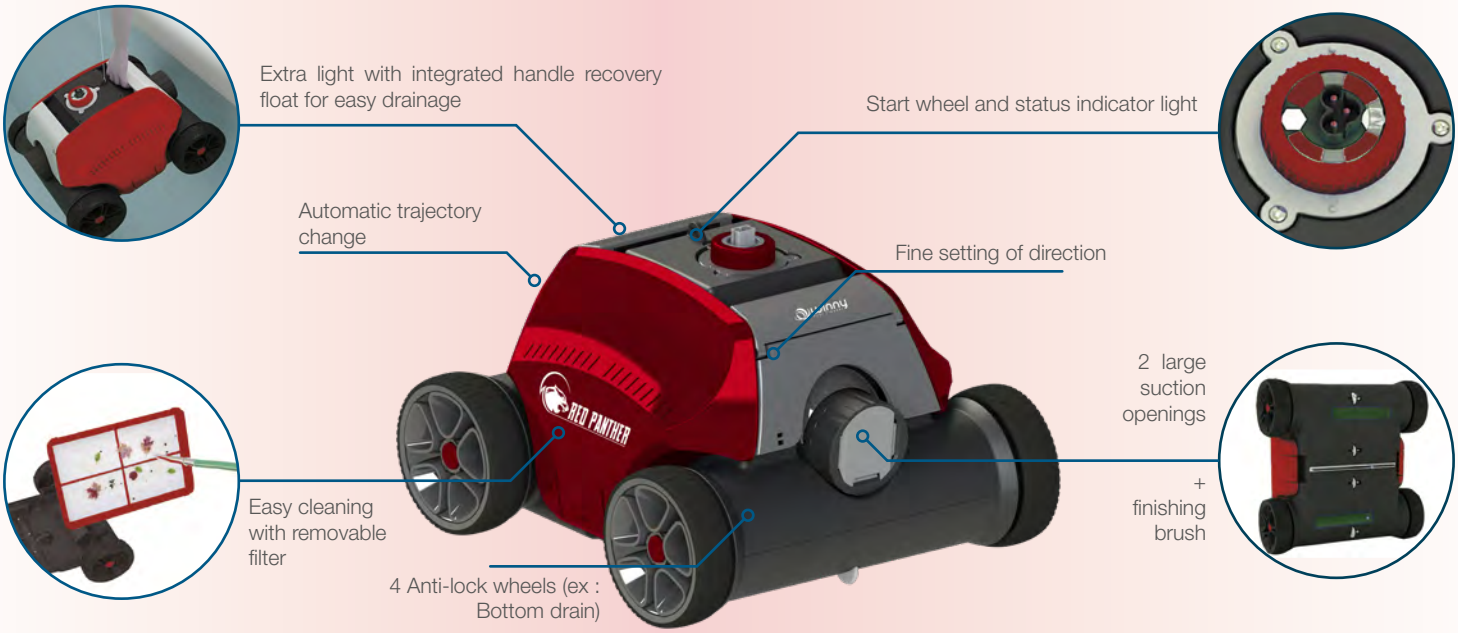
- IDEAL TO CLEAN THE BOTTOM OF THE POOL
Speed 18m/min on a flat ground

- AUTOMATIC FONCTIONNING
120 min cycle and low battery detection system

- CHANGE IN DIRECTION
when detecting an obstacle

- HIGH FILTRATION CAPACITY
10-11m³/h

- FLOATING HANDLE
for easy water removal



Included accessories :

- AC charger 230V 50Hz
- User Manual
- Washable filter
- Removal robe
- Floating handle

Autonomy	up to 120 min
Luthium-ion battery	6600mAh
Engine power	50W / 12V
Filtration capacity	10-11m³/h
Density of filter	150µm
Speed	18m/min
Weight	5.5kg

Operating temperature	10°C - 35°C
Loading time	6h (full)
	3-4h (quick)
Dimensions	40x36x27cm
Surface	Flat
IP Index	IPX8

Edition Novembre 2019 - Photos non contractuelles
