VENETIAN HYBRID

EVERY DAY BLESSINGS

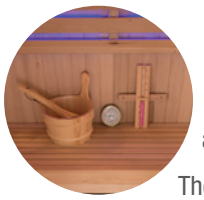

Enjoy a relaxing moment at home in this sauna made from Canadian spruce wood. Its design all in lightness enhanced with glazed surfaces and louvred wooden shutters add a contemporary touch to your personal relaxation space.

The Venetian Hybrid combines three technologies – Quartz & Magnesium infrared as well as steam – to offer you a larger selection: while the steam over the stove soaks the cabin with heat favourable to general relaxation, Quartz and Magnesium rays are conducive to detoxification and joint and muscle relaxation. The comfort of the wooden bench combined with chromotherapy create a true moment of well-being.

INCLUDED ACCESSORIES

Harvia stove and steam accessories included.

The Venetian Hybrid is originally equipped with a 3.5kw Harvia stove and lava stones, sized according to the cabin's dimensions.

We also include all accessories essential to a steam sauna such as a wooden bucket and ladle, a thermometer and a hourglass.

MAIN FEATURES

Exterior in Canadian Spruce

Glazed surfaces and louvred wooden shutters

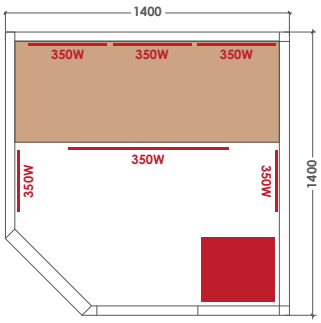

Harvia stove included, as well as sauna kit

LED chromotherapy and soft lighting

CHARACTERISTICS
