Ozone treatment

LED light spot + Perimetrical LED lighting

Easily plugs in with a 16A electrical outlet

Integrate the world of the professional spa with the Halfmoon spa from Net-Spa. Its ideal size and curved design allow you to create a wellness and relaxation space wherever you want.

Comfortably installed in 38°C water, you can enjoy your spa lounged for a Shiatsu back and leg massage that provides deep relaxation.

Seated, you can benefit from 3 different types of massage, allowing you to create a massage circuit without even taking your shoulders out of the water. Enjoy complete relaxation of body and mind. You come out of your session relaxed, ready to face new challenges.

Your Netspa is equipped with a Balboa control panel and heater, a Lucite / Aristech USA acrylic tub, and an ozone disinfection solution that limits chemical water treatments usage.

Install, plug and enjoy thanks to the Plug & Play technology that enables you to simply plug your new Halfmoon into a 16A household electrical outlet.

Your Halfmoon Spa will accompany you for a long time in your relaxation sessions.

Plug and Play

Install, plug in, enjoy!
Simply connect your spa to an electrical outlet and turn it on

TP 500 Balboa Control panel

Backlit control panel

Floating skimmer

Adjusts itself to the water level for optimum filtration regardless of the number of users

Two-Speed pump 2.2 CV

With its 2 operational speeds, this pump manages both water circulation and massaging functionalities.

Ozone treatment

This treatment solution destroys bacteria, viruses and algae efficiently while limiting chemical treatment usage.

LED lighting

Equipped with perimetrical LED and a LED spot at the centre of the tub, add ambiance to your spa session according to your mood.

Safe, isothermal cover included

Essential to ensure water temperature is maintained while heat loss is kept to a minimum, but also serves to secure the spa and limit access to children.
