# TRADITIONAL SAUNA ECCOLO

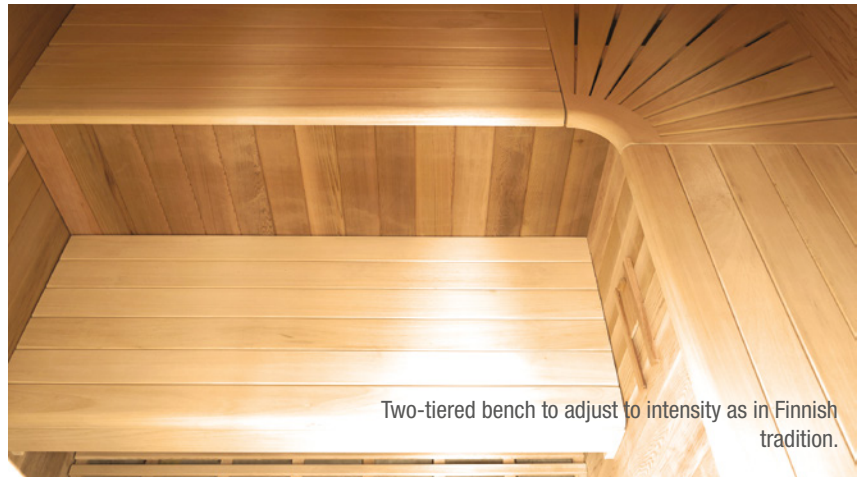

## ECCOLO

MINIMUM CONSUMPTION, MAXIMUM COMFORT

A sauna, which insulation has been optimized for significant energy savings.

Parameters have been studied to ensure the sauna is energy-efficient. Its walls are insulated and the space beneath the benches is closed up for optimal insulation. Door closing and its structure have been designed to prevent heat loss.

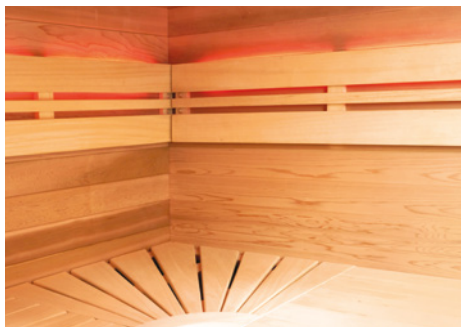

For a substantial number of users (6 persons), such a sauna normally requires an 8 kW stove connected to a 380 v power socket. With our excellent insulation, a simple 4.5 kW stove, as found in a sauna for 3 persons, is sufficient.

### MAIN FEATURES

Hemlock and red cedar

Large choice of ambiances, soft lighting and LED chromotherapy.

### ACCESSORIES INCLUDED

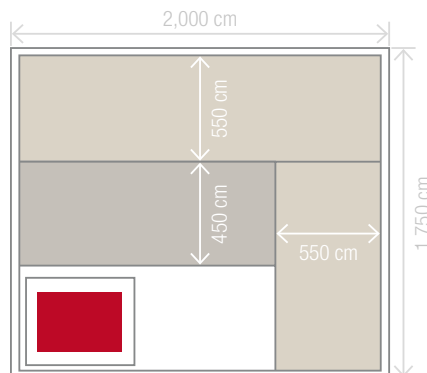

**The Harvia stove and accessories are included.**

The Eccolo comes equipped with a 4.5 kW Harvia stove and lava stones, all ideally proportioned.

We also include the essential accessories in all our steam saunas, such as bucket, wooden ladle, thermometer and hourglass.

### FEATURES
